Co-op Opportunity:

The Jonah Group is looking for self-motivated and enthusiastic learners to join our team of accomplished tech professionals to produce custom, high-quality solutions for clients.

What We Do:
As a medium-sized consulting firm, we take on high-profile clients and brand names in many industries. Our solutions range across areas like auto finance, eHealth, capital markets, education, governmental, and pension initiatives (to name a few). We are consistently working towards designing and building high-performing enterprise digital solutions with emphasis placed on great user experience, robust architecture, and a perfect fit. Here at Jonah, you'll have the opportunity to contribute your theoretical knowledge in a technically diverse environment alongside our team of software experts.

What You'll Do:
- Develop, maintain, and integrate coding throughout the software development lifecycle
- Work alongside a team of skilled professionals to gather project requirements, communicate technical problems, and recommend creative solutions
- Conduct unit and regression testing
- Write and maintain documentation for internal purposes as well as for the customer
- Interact with the client when necessary
- Be a member of small, collaborative groups, with the opportunity to own your contributions as well as support your team

Your Preferred Profile:
- Excellent written and verbal communication skills
- Self-learner with a strong interest in emerging technologies
- Strong understanding of programming fundamentals with a passion for coding; you're the type of person who has multiple side projects that dive deep into the code!
- You create functional and refined solutions that clients will want to use
- Experience in Java or C#, Oracle, SQL, and unit testing
- Flexible and able to adapt to changing environments

What We Can Offer You:
- Working alongside experienced developers in a team environment
- Ability to flex your creativity muscle, and have your opinions heard
- A work culture where you'll look forward to coming in every day
- Enough coffee and tea to appease your daily caffeine fix
- Free food and beverages during events like Thursday Night Socials
- Downtown Toronto location (easily accessible by public transit)

We want to thank all individuals who apply and will be contacting suitably qualified applicants.
